Mid North Coast

Adam Spencer

MC & Keynote

One of Australia's most dynamic and engaging minds, Adam Spencer is the iconic star of radio and television and now a leading conference MC and Keynote speaker on all things tech – from AI and the Chat GPT Revolution, to Cyber security and the future of work.

Adam is a witty and engaging event host and is all about growing knowledge and getting conversations started on the hot topics of our time.

Chelsea Capizzi-Walsh

Executive Manager of Crisis Management, Commonwealth Bank

Chelsea is responsible for global group-wide crisis management at CommBank, organising and tailoring responses to large scale disruptive events such as physical threats, third-party impacts, technology incidents and global issues. Chelsea will share her insights and learnings on developing capabilities and plans, emerging risks for businesses, their need to be resilient to prevent disruption, and learnings from how CommBank responds to incidents, scams and fraud.

Kim Krogh Andersen

Telstra Group Executive, Product & Technology

Kim leads Telstra's product and Technology function, responsible for the organisation's product strategy and lifecycle as well as technology and innovation where products are incubated and brought to scale. Kim is also accountable for Telstra's IT and Data & AI functions accelerating the organisation's digital leadership. Hear from Kim as he talks about the evolution of technology, what innovations are emerging and how these will change the connectivity landscape in Australia.

Dr Immaculate Motsi-Omoijiade

Responsible AI Lead, Charles Sturt University

Dr. Immaculate (Mac) Motsi-Omoijiade is a Senior Research Fellow and Responsible AI Lead at the AI and Cyber Futures Institute at Charles Sturt University. Her research focuses on the safe and ethical deployment of AI systems, emphasizing the legal and policy dimensions across various industries and commercial use cases. Mac will highlight the rapid pace of technological advancement and its transformative impact on business with an emphasis on the need for responsible use to ensure ethical, sustainable and legally compliant deployment.
